Our Standard boats and kits include 1088BS Hydrotek Meranti Plywood or AB Marine Douglas Fir, Port Orford White Cedar Frames, Mahogany bow stem, Gunwales, chines, and White Oak Chine caps. Seat Framing and Floors are a Clear, Vertical Grain Douglas Fir. White Oak may also be used to substitute Mahogany for those that would prefer more contrast in color with a Hydrotek Plywood option upon request with no additional charge. I also like to send sapele for other accent pieces like gunwale blocks and wedges for example. All other wood options will require revised pricing and may be subject to longer lead times. Okoume Plywood is a small price increase, call for pricing.

*All kits come standard with Stainless Steel fasteners, UHMW oarlock blocks, and necessary hardware for assembly.

*ask about other options such as Fiberglass treatment of the hull, composite bottom upgrade, storage under Passenger seat, stackable option for guide/outfitter boats and Paint/Varnish options.
